

Discovery Scuba diving

A **PADI Discovery Scuba Diving (DSD)** experience is a beginner-friendly introduction to scuba diving designed for people who have never dived before. It's a supervised, non-certification program that lets you try diving safely in shallow, controlled conditions.

What it is

The program by PADI is a short, guided underwater experience where an instructor teaches you the basics and takes you diving—usually in a pool or calm open water.

What you'll learn

- Basic scuba equipment use (mask, regulator, fins, tank)
- Simple underwater communication signals
- Breathing underwater and equalizing pressure
- Safety rules and instructor-led control throughout the dive

Typical experience flow

- Brief theory session (20–30 minutes)
- Practice in shallow water or pool
- Guided open-water dive (usually max 5–12 meters depth)
- Total experience often lasts half a day to one day

PRICE: 50 OMR FOR 2 DIVES
40 OMR FOR 1 DIVE

Padi Open water course

The **PADI Open Water Diver course** is the world's most popular entry-level scuba certification, offered by PADI. It qualifies you to dive independently with a buddy up to 18 meters anywhere in the world.

What the course includes

- **Theory (Knowledge Development)** – Learn diving principles, safety rules, pressure, equipment, and underwater communication
- **Confined Water Training** – Practice basic scuba skills in a pool or shallow controlled environment
- **Open Water Dives (4 dives)** – Real dives in the ocean under instructor supervision

Skills you will learn

- Setting up and using scuba equipment
- Breathing and buoyancy control underwater
- Mask clearing and regulator recovery
- Safe ascent and descent techniques
- Underwater navigation basics

Course duration

- Typically **3 to 5 days** (can vary based on location and schedule)
- Flexible e-learning option available for theory before arrival

Requirements

- Minimum age: **10–15+ depending on certification level (Junior/Standard Open Water)**
- Basic swimming ability
- Good health (medical questionnaire required)

Certification benefits

- Dive independently with a buddy (up to 18m)
- Recognized globally at dive centers and resorts
- Pathway to advanced diving courses like Advanced Open Water, Rescue Diver, and specialties

PRICE: 200 OMR

Padi Advance Open Water Course.

The **PADI Advanced Open Water Diver course** by PADI is the next step after Open Water, designed to build confidence, expand skills, and let you explore deeper and more specialized diving experiences.

What the course includes

You complete **5 adventure dives**, each focused on a different type of diving experience:

- **Deep Dive** – Learn to safely dive up to 30 meters
- **Underwater Navigation** – Improve compass and natural navigation skills
- **3 Elective Dives** – Choose based on interest (e.g., night diving, drift diving, wreck diving, buoyancy control, fish identification)

Skills you will learn

- Advanced buoyancy control for smoother diving
- Deep diving safety techniques and planning
- Better underwater navigation and awareness
- Specialty diving basics depending on chosen dives

Course duration

- Typically **2 to 3 days**
- Can be completed over a weekend in many dive centers
- Flexible scheduling depending on location and conditions

Requirements

- Must hold **PADI Open Water Diver certification** (or equivalent)
- Minimum age: usually **12–15+ depending on agency rules and dive type**
- Basic diving experience and comfort underwater

Certification benefits

- Dive deeper up to **30 meters**
- Gain experience in different dive environments
- Unlock access to specialty courses (wreck, night, rescue, etc.)
- Improve confidence and dive control in real conditions

PRICE: 190 OMR

Padi EFR + Rescue Course.

The **PADI Rescue Diver course** and **Emergency First Response (EFR)** training by PADI are advanced-level programs designed to improve diver safety, confidence, and emergency handling skills both underwater and on land.

Emergency First Response (EFR)

EFR is a first aid and CPR training program that prepares you to respond to medical emergencies.

- Primary and secondary care (CPR, first aid, AED use)
- Injury assessment and emergency response steps
- Choking management and shock treatment
- Practical, scenario-based training for real-life situations

PADI Rescue Diver Course

The Rescue Diver course focuses on preventing and managing diving emergencies.

- Self-rescue techniques and diver stress management
- Assisting tired, panicked, or unresponsive divers
- Underwater search and recovery basics
- Emergency planning and rescue scenarios

Course structure

- EFR training: usually **1 day**
- Rescue Diver course: typically **2–3 days**
- Includes theory, confined water practice, and open water rescue scenarios

Requirements

- Must be a **PADI Advanced Open Water Diver (or equivalent)**
- Valid EFR certification (or complete it alongside the course)
- Minimum age: generally **12–15+ depending on certification level**
- Good swimming ability and diving experience

Certification benefits

- Builds confidence in handling real diving emergencies
- Essential step toward becoming a professional diver (Divemaster)

- Enhances safety awareness for all types of diving
- Recognized globally in professional diving progression
